

GM Pricing Quick Reference Guide

General Motors has partnered with OEConnection (OEC) and AudaExplore to provide a dynamic Original Equipment Manufacturer (OEM) part pricing solution.

Audatex Estimating(TM) features a service that automatically retrieves GM OEM pricing when an assignment is received for an applicable vehicle containing the vehicle information number (VIN).

When a VIN is available with the assignment or when a new estimate is created, the prices will be retrieved automatically after identifying the vehicle. Disconnected users will need to have an internet connection to retrieve OEM prices.

Retrieving OEM Pricing

1. Click **Damage** on the left side navigation.
2. The wait dialog window is displayed while the OEM Pricing is being retrieved.

Note: The **Retrieve OEM Prices** link is **red** when the OEM price file has not been retrieved or is not available for the claim.

The **Retrieve OEM Prices** link is **black** when the OEM price file has been retrieved for the vehicle and is available.

3. Click **Close** on the left side navigation when the estimate is complete.
4. When the estimate is closed, the claim information is sent to OE Connection to obtain Quote ID.

Retrieving OEM Pricing

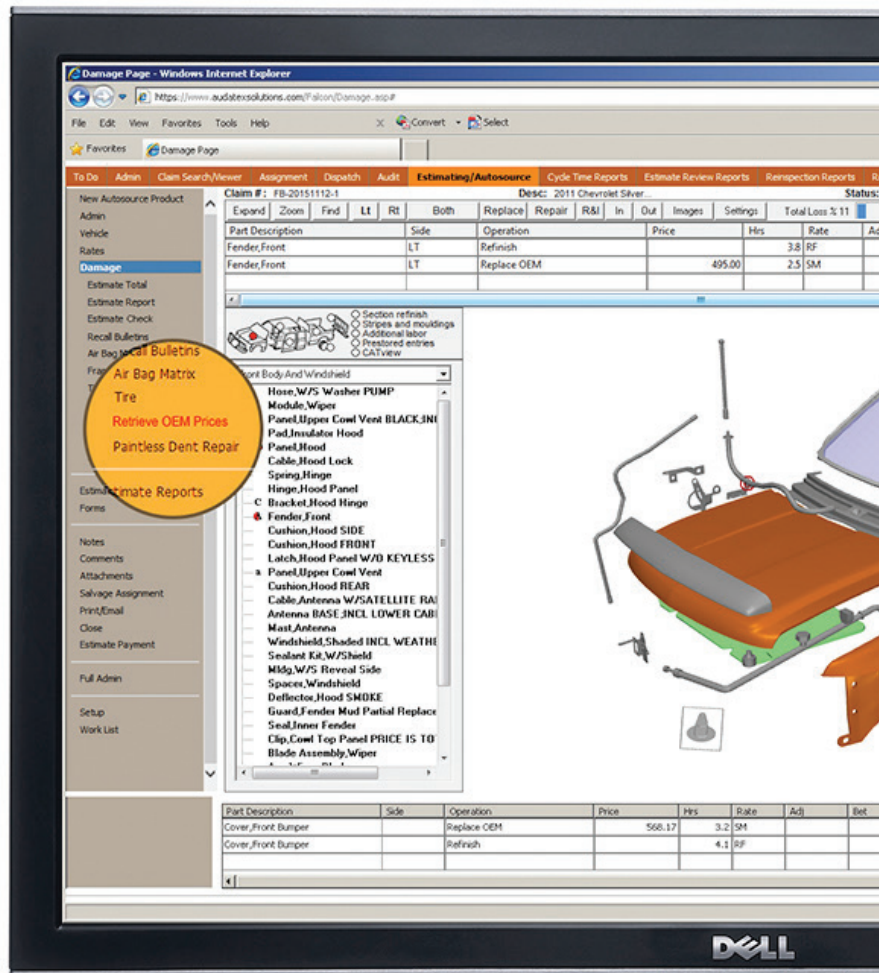

1. The Quote ID appears on the Estimate Report Vehicle Section for reference.

Vehicle

OEM Part Price Quote ID: 2719745

2005 GMC Envoy XL SLE 4 DR Wagon
6cyl Gasoline 4.2
4 Speed Automatic
